

VENOSTOR (Diosmin & Hesperidin)

VENOSTOR (Diosmin/Hesperidin) is a unique natural formula that combines two powerful antioxidant flavonoids to support healthy blood flow in the legs and throughout the body. Derived from the sweet orange (Citrus aurantium skin), VENOSTOR (Diosmin/Hesperidin) supports circulatory health.

- VENOSTOR 500 mg is a unique micronized purified flavonoid fraction (MPFF) containing 90% diosmin (450 mg) and 10% flavonoids (50 mg) expressed as Hesperidin.
- treatment of venous disease
- chronic venous disease (CVD)
- hemorrhoidal disease (HD)
- dietary supplement

Other ingredients: Gelatin, microcrystalline cellulose (plant fiber), may contain one or both of the following: magnesium stearate, silica.

Suggested Use: As a dietary supplement, take one capsule two times per day with water.

What is VENOSTOR ?

in other countries Taj Pharma VENOSTOR is a nutritional supplement which contains MPFF - Micronized Purified Flavonoid Fraction - a combination of diosmin (450 mg) and hesperidin (50 mg) in ratio 9:1. 1 capsule of VENOSTOR contains: diosmin - 450 mg hesperidin - 50 mg

How to dose VENOSTOR ?

Adults: 2 capsules per day Do not exceed the recommended daily dose. Nutritional supplement cannot substitute for a healthy, balanced diet.

Available packages of VENOSTOR : VENOSTOR - package containing 30 Tablet Chronic Venous Insufficiency CVI - Chronic Venous Insufficiency Chronic venous insufficiency is a syndrome associated with venous blood stasis in veins, reflux (return venous flow) and occlusion of veins. These symptoms lead to abnormal return of venous blood from limbs to heart. First symptoms of CVI are little swellings occurring mainly in late hours, discoloration and appearance of small veins on the skin. With progress of disease, patient can suffer from "leg heaviness", resolving after short rest with legs elevated over the level of heart. Further progress leads to development of varicose veins, edema, recurrent inflammation of the veins, bleeding from varicose veins and trophic skin changes. MPFF - Micronized Purified Flavonoid Fraction MPFF - is a shortage from Micronized Purified Flavonoid Fraction which is a combination of diosmin with hesperidin in ratio 9:1. Diosmin Diosmin is a molecule belonging to flavonoids. It is a natural substance extracted from citrus fruits, mainly from Citrus aurantium. Diosmin increases venous tone through increasing in sensitivity to Ca²⁺ preventing blood stasis in venous system, mainly in lower limbs. Diosmin also acts antiedematously by improving lymphatic drainage and lymph flow. Hesperidin Hesperidin is also one of flavonoids and similarly to diosmin comes from the nature and is extracted from citrus fruits. Hesperidin is a strong anti-inflammatory molecule.

VENOSTOR (Diosmin & Hesperidin)

Hesperidin is a compound in orange peels that gives the flavonoid *hesperitin* to the body, and this flavonoid mediates most benefits of hesperidin including an increase in circulation and possible brain protective effects. Hesperidin, alongside naringenin, are known as the main citrus flavonoids.
